## Project Design Phase-II Technology Stack (Architecture & Stack)

| Date          | 30 October 2022                                  |
|---------------|--|
| Team ID       | PNT2022TMID40624                                 |
| Project Name  | Real time communication system powered by AI for |
|               | specially disabled                               |
| Maximum Marks | 4 Marks  |

## **Technical Architecture:**

The Deliverable shall include the architectural diagram as below and the information as per the table 1 & table 2

**Example:** Real time communication system powered by AI for specially disabled

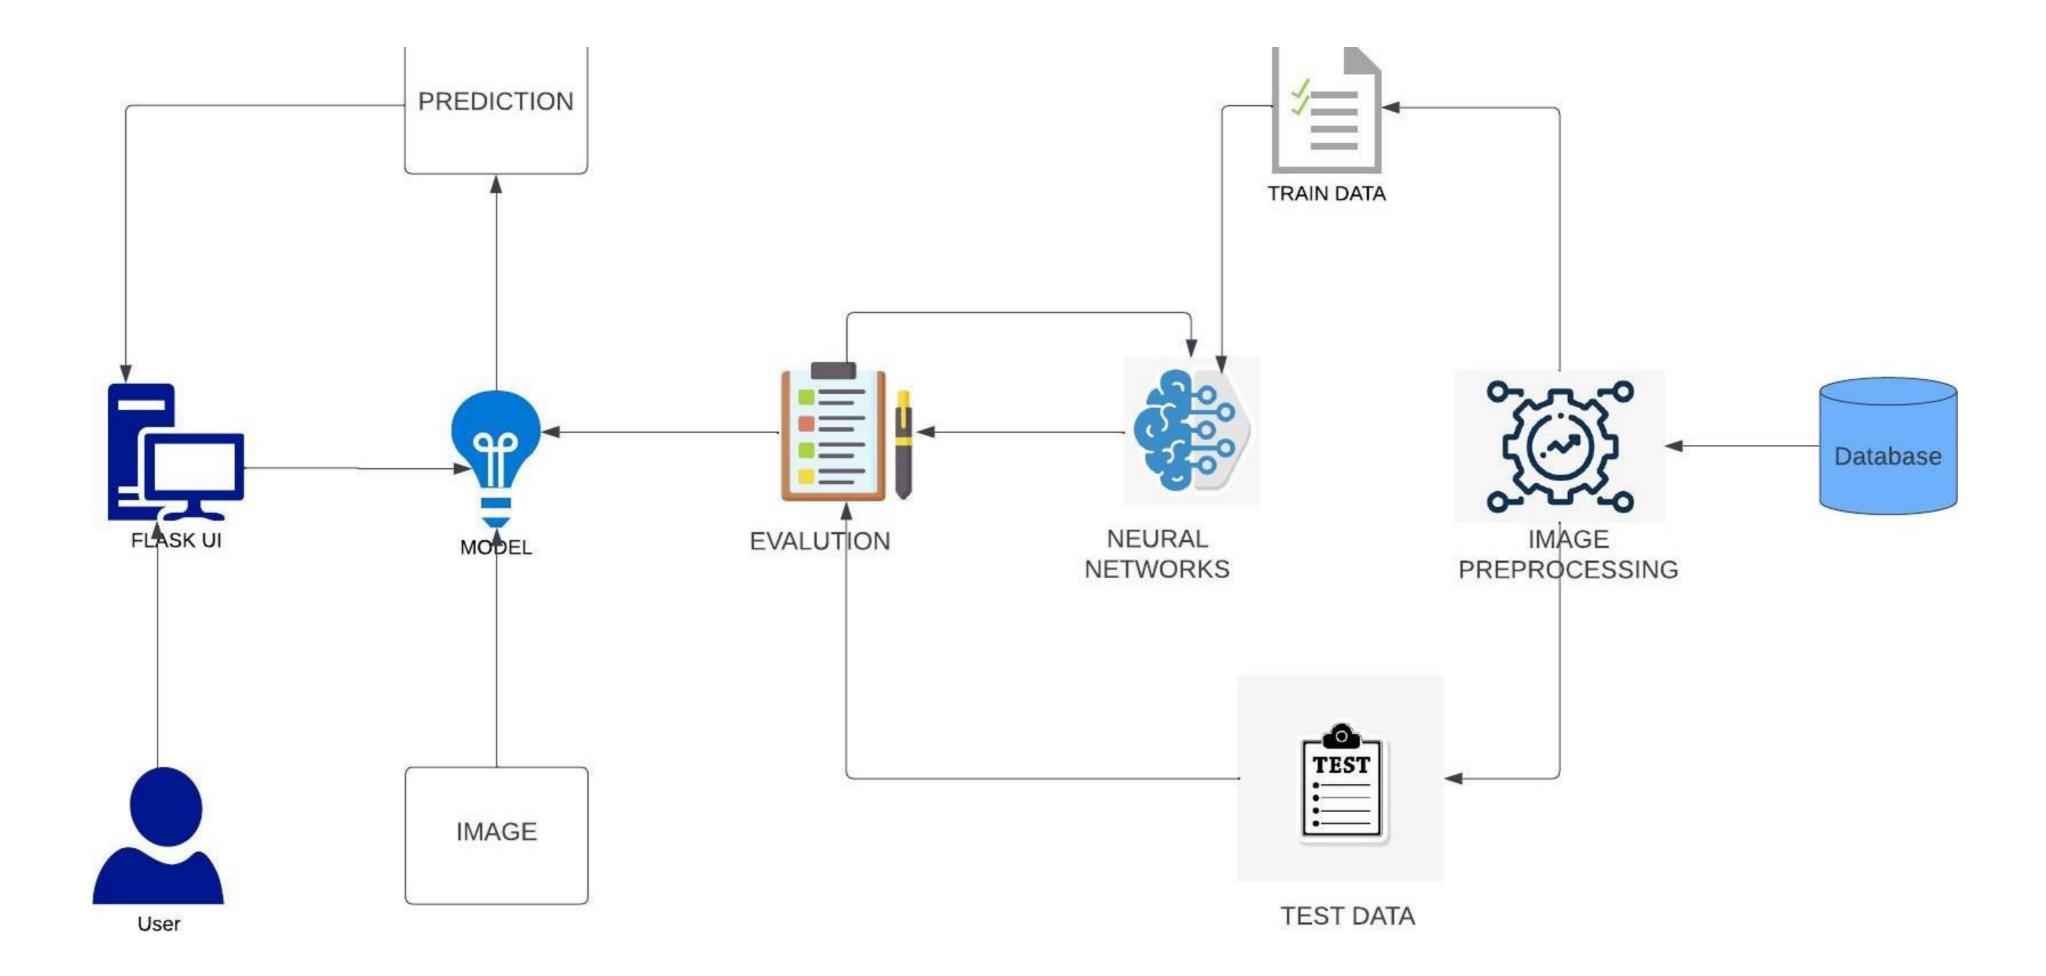

Table-1: Components & Technologies:

| S.No | Component              | Description   | Technology   |
|------|------------------------|---|--|
| 1.   | User Interface         | The user interface is the point of human computer interaction and communication in device | HTML, CSS, JavaScript / Angular<br>Js / React Js etc.                |
| 2.   | Application Logic-1    | Converting speech into sign language  | Java / Python  |
| 3.   | Application Logic-2    | Converting to sign language to speech   | IBM Watson STT service   |
| 4.   | Application Logic-3    | Converting to speech to readable content  | IBM Watson Assistant   |
| 5.   | Database               | Data Type, Configurations etc.  | MySQL, Rational database etc.  |
| 6.   | Cloud Database         | Database Service on Cloud   | IBM DB2, IBM Cloudant etc.   |
| 7.   | File Storage           | Methodology used to organize and store data on a computer hard drive                      | IBM Block Storage or Other<br>Storage Service or Local<br>Filesystem |
| 8.   | External API           | Defines communication between normal people and deaf people                               | IBM Weather API, etc.  |
| 9.   | Machine Learning Model | Training  | Object Recognition Model, etc.                                       |

## Table-2: Application Characteristics:

| S.No | Characteristics          | Description   | Technology   |
|------|--------------------------|---|--|
| 1.   | Open-Source Frameworks   | List the open-source frameworks used  | Technology of Opensource framework                     |
| 2.   | Security Implementations | List all the security / access controls implemented, use of firewalls etc.  | e.g. SHA-256, Encryptions, IAM<br>Controls, OWASP etc. |
| 3.   | Scalable Architecture    | Justify the scalability of architecture (3 – tier, Microservices)   | Devops   |
| 4.   | Availability             | Justify the availability of application (e.g. use of load balancers, distributed servers etc.)                            | Conferencing technology                                |
| 5.   | Performance              | Design consideration for the performance of the application (number of requests per sec, use of Cache, use of CDN's) etc. | NLP  |
